

## Recombinant Swine Transforming Growth Factor-Beta-Induced Protein ig-h3 (TGFBI), N-His

Cat. No.: AP9C879

Product Type: Animal Proteins

Size: 10 µg; 50 µg; 200 µg; 1 mg; 5 mg

### Product Overview

BioVenic's Recombinant Swine Transforming Growth Factor-Beta-Induced Protein ig-h3 (TGFBI), N-His is a recombinant protein expressed from *E.coli*. Its predicted molecular weight is N/A. The purity is >97% (SDS-PAGE).

### Specifications

Type	Recombinant Protein
Species	Swine
Expression System	<i>E.coli</i>
Purity	>97% (SDS-PAGE)
Endotoxin	< 1 EU/µg
Predicted Molecular Weight	N/A
Physical State	Lyophilized
Formulation	The buffer before lyophilization is PBS, pH7.4, containing 0.01% SKL, 1mM DTT, 5% Trehalose and Proclin300.

### Target Information

Swine transforming growth factor beta induced protein is involved in immune regulation, cell proliferation, and tissue repair. It plays a role in inhibiting immune cell proliferation and cytokine production, and promotes extracellular matrix formation, which is crucial for wound healing and tissue morphogenesis in swine.

Protein	Swine Transforming Growth Factor-Beta-Induced Protein ig-h3 (TGFBI)
Protein Synonym	TGF-BI; CSD3; LCD1; CSD1; CSD2; BIGH3; CDB1; CDGG1; RGD-CAP; Kerato-Epithelin; RGD-Containing Collagen-Associated Protein
Gene ID	<a href="#">397078</a>
UniProt ID	<a href="#">397078</a>

### Shipping and Storage

This product is shipped with dry ice. It is recommended to aliquote as needed and store at  $-80^{\circ}\text{C}$  upon receipt. Reconstituted protein solution can be stored at  $4^{\circ}\text{C}$  for 1 week, at  $< -80^{\circ}\text{C}$  for 12 months.

---

## User Note

Always centrifuge tubes before opening. Avoid mixing by vortexing or pipetting. Reconstitute in 10mM PBS (pH7.4) to a concentration of 0.1-1.0 mg/mL. Aliquote the reconstituted solution to minimise freeze-thaw cycles.
