

Rabbit Lacrimal Duct Epithelial Primary Cells-Immortalized by SV40T

Cat. No.: CC10F4

Product Type: Animal Cells and Cell Lines

Product Overview

Immortalized Rabbit Lacrimal Duct Epithelial Primary Cells are isolated from rabbit normal lacrimal duct tissue and exhibited an extended lifespan compared to normal primary cells. These primary cells are immortalized by overexpressing the large T-antigen of the simian virus 40 (SV40T antigens). Immortalized Rabbit Lacrimal Duct Epithelial Primary Cell products are utilized in various standard biochemical procedures to characterize cell products and derivatives, as well as to investigate cell-cell interactions.

Specifications

Cell Product Type	Primary Cells-Immortalized
Species	Rabbit
Cell Type	Epithelial Cells
Source	Normal Lacrimal Duct Tissue
Growth Information	Adherent; 37°C; 5%CO ₂
Quality Control	Mycoplasma (-); Bacteria (-); Yeast (-); Fungi (-)
Physical State	Frozen cells

Shipping and Storage

This product is shipped with dry ice. It's recommended to store the product with liquid nitrogen and never in a -20 °C or -80 °C refrigerator. Avoid repeated freezing and thawing of the product.

The product is for research use only. Not for commercial, prophylactic, diagnostic, or therapeutic applications. Please determine the purpose of the product before purchasing. For further information and inquiry, please contact us.
