

Rat Dental Pulp Stem Cells

Cat. No.: CC7F423

Product Type: Animal Cells and Cell Lines

Product Overview

Rat dental pulp stem cells are isolated and cultured from the tooth pulp tissue of rats. These primary cells were obtained after isolation and culture, and they exhibit high vitality and activity. Rat dental pulp stem cell products are utilized in various standard biochemical procedures, including RT-PCR, western blotting, immunoprecipitation, and flow cytometry, for scientific research purposes.

Specifications

Cell Product Type	Primary Cells
Species	Rat
Cell Type	Stem Cells
Source	Tooth Pulp
Growth Information	Adherent; 37°C; 5%CO ₂
Quality Control	Mycoplasma (-); Bacteria (-); Yeast (-); Fungi (-)
Physical State	Frozen cells

Shipping and Storage

This product is shipped with dry ice. It's recommended to store the product with liquid nitrogen and never in a -20 °C or -80 °C refrigerator. Avoid repeated freezing and thawing of the product.

The product is for research use only. Not for commercial, prophylactic, diagnostic, or therapeutic applications. Please determine the purpose of the product before purchasing. For further information and inquiry, please contact us.
