

## Mouse Primary NK Cells

Cat. No.: CC7F599

Product Type: Animal Cells and Cell Lines

---

### Product Overview

Mouse primary NK cells are isolated and cultured from the peripheral blood tissue of the mouse. These primary cells were obtained after isolation and culture, and they exhibit high vitality and activity. Mouse primary NK cell products are utilized in various standard biochemical procedures, including RT-PCR, western blotting, immunoprecipitation, and flow cytometry, for scientific research purposes.

### Specifications

|                    |                                                    |
|--------------------|----------------------------------------------------|
| Cell Product Type  | Primary Cells                                      |
| Species            | Mouse                                              |
| Cell Type          | NK Cells                                           |
| Source             | Peripheral Blood                                   |
| Growth Information | Adherent; 37°C; 5%CO <sub>2</sub>                  |
| Quality Control    | Mycoplasma (-); Bacteria (-); Yeast (-); Fungi (-) |
| Physical State     | Frozen cells                                       |
