

Monkey Bone Marrow Mesenchymal Stem Cells

Cat. No.: CC7F992

Product Type: Animal Cells and Cell Lines

Product Overview

Monkey bone marrow mesenchymal stem cells are a type of adult stem cell that is derived from monkey bone marrow. They are cryopreserved to maintain their diversity and strong self-renewal ability. Monkey bone marrow mesenchymal stem cells have the potential to differentiate into various cell types and possess unique cytokine secretion functions. These are important scientific research products for studying animal cell proliferation and differentiation, individual aging, and body immunity.

Specifications

Cell Product Type	Mesenchymal Stem Cells
Species	Monkey
Cell Type	Stem Cells
Source	Bone Marrow
Growth Information	37°C; 5%CO ₂
Quality Control	Mycoplasma (-); Bacteria (-); Yeast (-); Fungi (-)
Physical State	Frozen cells

Shipping and Storage

This product is shipped with dry ice. It's recommended to store the product with liquid nitrogen and never in a -20 °C or -80 °C refrigerator. Avoid repeated freezing and thawing of the product.

The product is for research use only. Not for commercial, prophylactic, diagnostic, or therapeutic applications. Please determine the purpose of the product before purchasing. For further information and inquiry, please contact us.
