

## Trimethylamine-N-Oxide (TMAO) ELISA Kit-Sandwich

**Cat. No.:** EK1F608

**Product Type:** Animal Immunoassay Kits

**Size:** 48T;96T

### Product Overview

BioVenic General Trimethylamine-N-oxide (TMAO) ELISA Kit-Sandwich is designed for the quantitative determination of General Trimethylamine-N-oxide (TMAO) in serum, plasma, tissue homogenate, cell culture supernatant, cell extract, and other biological fluids using a Sandwich ELISA method. For research use only.

### Specifications

Assay Type	ELISA-Sandwich
Specificity	The assay kit is specific for General TMAO.
Target Species	General
Species Reactivity	General
Detection Range	15.63-1000 ng/mL
Sensitivity	4.93 ng/mL
Reproducibility	Intra-Assay: CV < 10%; Inter-Assay: CV < 10%
Assay Time	Around 210 min
Sample Requirement	Serum, plasma, tissue homogenate, cell culture supernatant, cell extract, and other biological fluids.

### Target Information

Trimethylamine N-oxide (TMAO) is an organic compound that belongs to the class of amine oxides. TMAO consists of a trimethylamine group (three methyl groups attached to a nitrogen atom) and an oxygen atom. TMAO is a product of the oxidation of trimethylamine, a common metabolite of choline in animals. It is a gut microbial-derived metabolite that has been suggested as a potential regulator of human health.

Target/Biomarker	General TMAO
Target Synonym	TMAO

### Shipping and Storage

This product is shipped with gel ice packs. It is recommended to store at 2-8 °C (Up to 6 months).
