

Rabbit Anti-Equine IgG Polyclonal Antibody-[HRP]

Cat. No.: VD11N561

Product Type: Animal-targeted Antibodies

Size: 500 µg

Product Overview

BioVenic rabbit polyclonal antibody is specific for equine IgG. It is affinity purified by CA-AS. It can be applied to ELISA assay of equine IgG.

Specifications

Application	ELISA
Clonality	Polyclonal
Classification	Primary Antibody
Clone	J1N68
Host	Rabbit
Target Species	Equine
Species Reactivity	Equine
Specificity	Equine IgG
Isotype	IgG
Immunogen	Recombinant protein of IgG
Purification	Purified by CA-AS
Conjugation	HRP
Buffer	0.01M Phosphate Buffered Saline, pH 7.4
Physical State	Liquid

Target Information

Equine IgG is a crucial component of the immune system in horses, with seven subclasses identified, each with distinct effector functions that have implications for vaccine strategies. These subclasses vary in their ability to interact with Fc receptors on effector cells and activate the complement system via the classical pathway. IgG1, IgG3, IgG4, and IgG7 are particularly effective in eliciting a strong respiratory burst from equine peripheral blood leukocytes and in binding complement C3q.

Shipping and Storage

This product is shipped with wet ice packs. Store at -20°C on receipt (up to 12 months). Avoid repeated freezing and thawing as this may denature the antibody.
